### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The invention differs from the prior art in that the claimed pressure-dependent volume flow reducing valve **reduces the fuel flow volume to the jet pump** as the fuel pump pressure increases. The prior art systems include valve arrangements to reduce the flow to the jet pump when the fuel pump pressure is low or transient (e.g. engine starting) in order to supply all of the available fuel to the engine at such times. See Eck and Bauer et al for example.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
